## Rise of the Crypto Dog Movement

Not long ago, the entire world witnessed the unexpected and meteoric rise of one of the most well known asset classes in the crypto market today, crypto dog-meme coins. Interest in the dog-themed tokens began catching fire across social media outlets as millions joined together forming active online communities, all standing behind the banner of a dog meme. Due to the extreme demand for these coins, exchanges started listing the most popular crypto dog projects. The floodgates opened and capital poured in from retail investors. Dog coins rose to the top ranks of the crypto market share, and a thriving new blockchain ecosystem was born.

## The Need for a Crypto Dog Park

After exploring and interacting with the dog coin ecosystems, our team discovered that even though there were many healthy dog coins, investment options for those coins were limited or did not exist.

This led to the development of Dog Park, a Dapp built for crypto dog holders that provides investment options for their favorite dog tokens. Dog Park gives users the ability to invest their dog tokens into Prize-Linked Staking Accounts nicknamed “Parks”, earning users big rewards while strengthening their token’s origin communities.

## What is Dog Park?

Dog Park is a cross-chain decentralized application that hosts multiple Prize-Linked Staking Accounts (PLSA), for crypto dog tokens. Each PLSA is represented as a “Park”. Users can enter a Park and become eligible to earn big rewards by staking (depositing) the appropriate token into the associated Park.

## Rewards for Staking in Dog Park

Each week we execute protocols to automatically invest the capital from the tokens staked in Dog Park into secure, stable, interest yielding accounts. The interest earned each week is used to fund all rewards. By staking in any Park, users receive all rewards.

**There are four main reward categories:**

### PRIZE WINNER

As long as you're staked in Dog Park, you have a weekly chance to win big money.

### ASSIST IN TOKEN BURNS

Each week we burn the token of your choice at no cost to you, enabling you to support your community.

Staking tokens guarantees weekly rewards in BUSD.

### RECEIVE STABLE REWARDS

You can always access your staked tokens.

### KEEP YOUR INVESTMENT

- **Prize Winner:** The largest sum of the interest is used to give a massive payout to five randomly selected users that are staked in each Park. The more a user has staked, the greater the chances of winning. This reward is always paid in the Park's token. For example, the Shiba Park pays its winners in Shiba Inu.

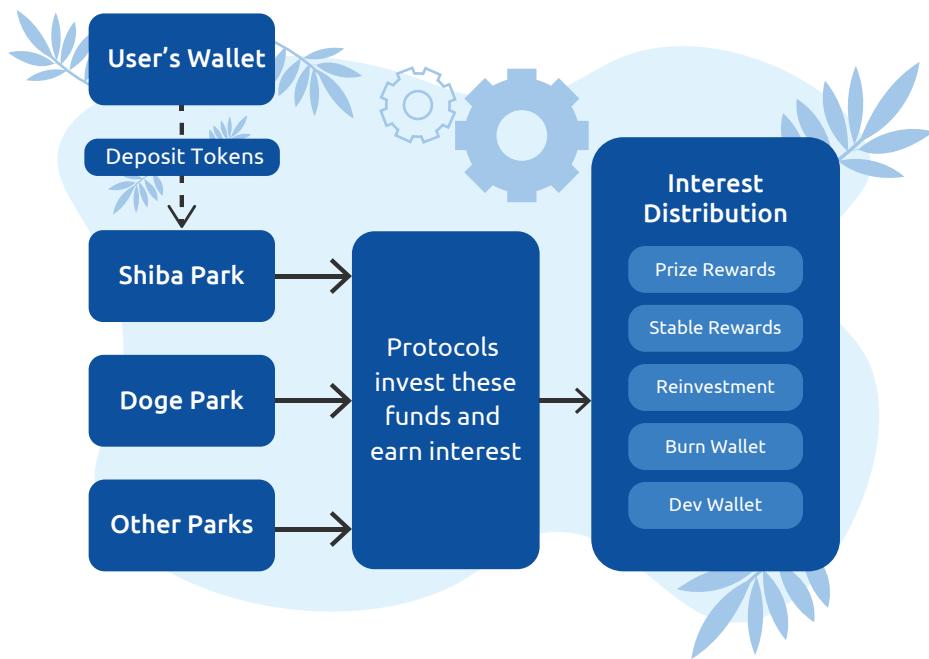

If you are not selected as a winner one week, don't worry, remaining staked keeps you eligible to win the following week. That's right, as long as you're staked in a Park you stay eligible to win this life changing prize.

- **Assist in Token Burns:** Each week, we use a portion of the interest to burn the respective Park's token. This means that tokens with a large circulating supply will reduce over time—helping your entire dog community. And because this burn comes from interest, users aren't losing their own tokens.
- **Receive Stable Rewards:** Each week, everyone staked in Dog Park receives stable rewards paid in BUSD. This is a massive upgrade from standard exchanges that pay rewards in their own token as all interest has a guaranteed and stable value.
- **Keep Your Investment:** Dog Park is a “no-loss” protocol. If users don't win the huge prize, they remain eligible indefinitely. If users want to withdraw their tokens, they can do so at any time. These protocols eliminate risk for the user while having a big upside potential. Your chance to win does not expire, so just “stake it till you make it”

# Dog Park Interest Distributions

Here is a breakdown of how all interest is distributed in the Dog Park protocols.

Reinvesting is a unique Dog Park protocol that creates a perpetual growth engine. This protocol takes a percentage of the weekly interest and puts it back into its respective Park. This money is not eligible to win any prizes, but acts as an investment buffer that increases the working capital each week. This means that every week the investment floor will rise, benefiting everyone staked in Dog Park.

## Estimated Staking Rewards

Park TVL	Weekly Prize Reward
\$20,000,000	\$57,692.31
\$100,000,000	\$288,461.54
\$250,000,000	\$721,153.85

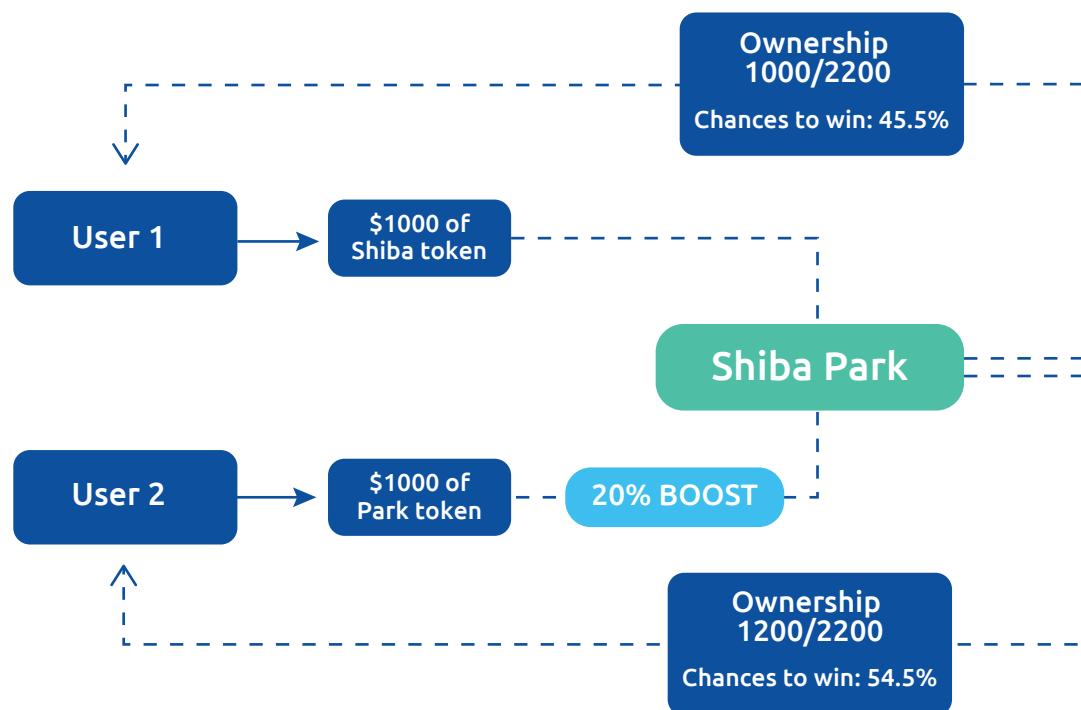

## Introducing PARK Token

PARK is a community driven BEP20 token. It has an initial supply of 4 billion tokens and half of those will be burned at launch (2B). PARK has two main purposes—to act as a stand alone investment through powerful tokenomics and as a keycard that opens users up to amazing benefits when used in Dog Park.

Designed with the end user in mind, PARK token enhances a user's experience at Dog Park by adding three major investor benefits:

- ❖ PARK is built on the Binance Smart Chain (BSC), lowering user gas fees on all Dog Park transactions.
- ❖ PARK is a universally accepted Dog Park token. This means PARK token holders can enter any Park they desire, winning rewards in the dog token of their choice.
- ❖ When users stake PARK, they receive a 20% boost to their investment. For example, if a user stakes \$1,000 of PARK, their odds of winning will be calculated as though they deposited \$1,200 of PARK.

## Two Ways to Enter a Park

## PARK Token Economics

PARK is unique in introducing a deflationary tax rate that begins at 9% and reduces to 7% over the course of 2 years. These taxes distribute to the following areas, adding more value and support to token holders

### Passive Reflections

4% of every transaction with PARK is redistributed to holders. This means that just by holding PARK you'll see your tokens increase each day.

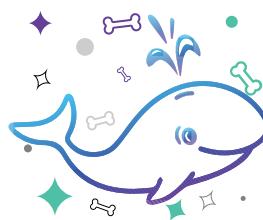

### Operational Support

3% of every transaction with PARK is redistributed to the developer wallet. This is used for marketing, growth, and supporting our engineers. Every 6 months this tax reduces by 0.5% until it reaches 1%.

### Liquidity Boost

2% of every transaction is used to bolster the liquidity pool and decrease volatility. This means PARK will steadily grow in value over time.

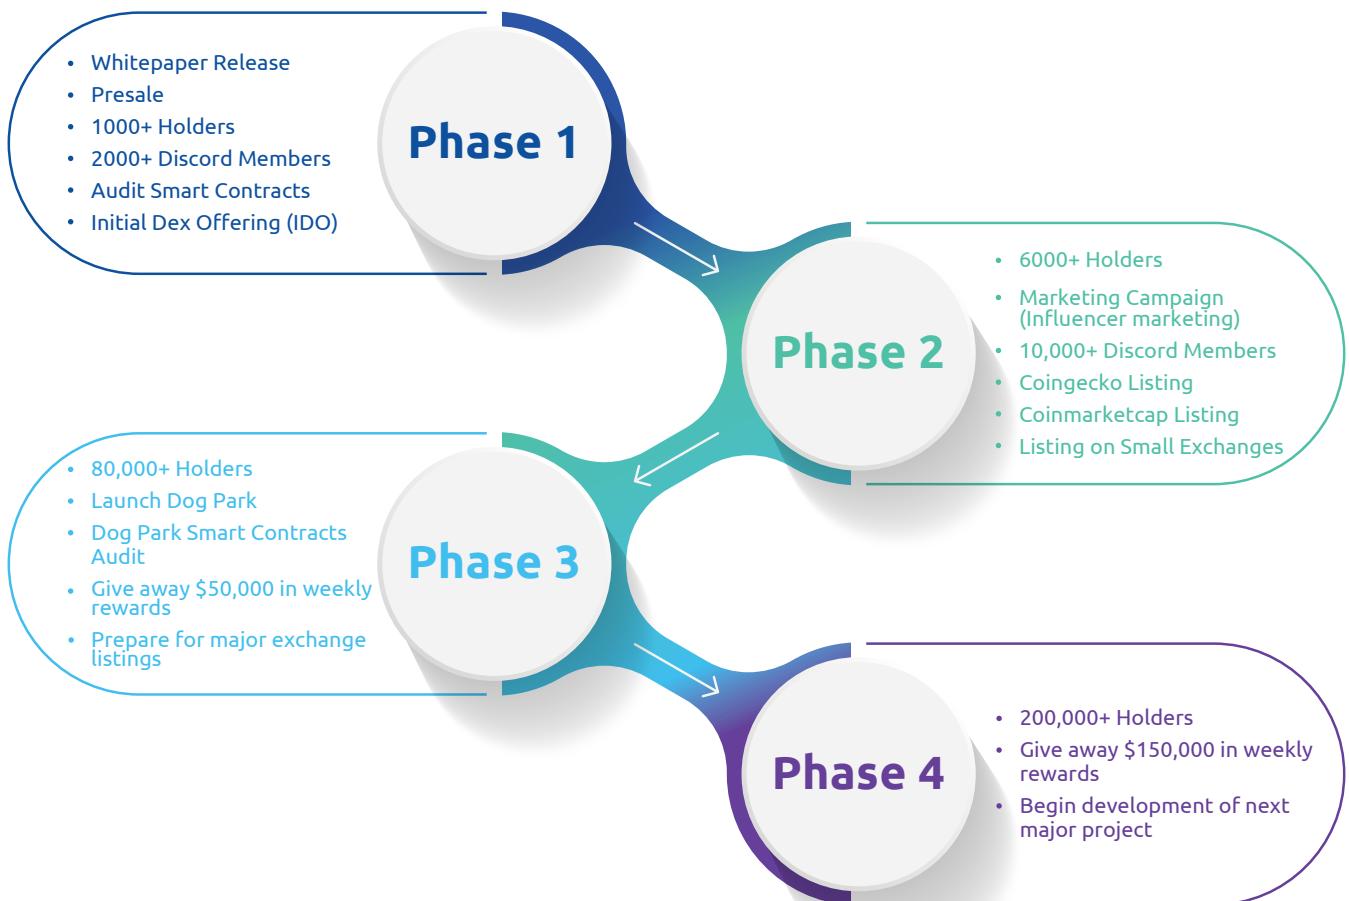

### Anti-Whale

All transactions are limited to 0.1% of the total supply. This prevents big wallet holders from price manipulation.

# Road Map

## This is Just the Beginning

Our team has a roadmap that extends into 2030 and beyond. We are thrilled to share our initial vision with you, what we're building, and why we're excited about it. We are grateful that you're joining us so early on this journey and hope we can support you and your dog community in getting to the moon.

After PARK and Dog Park launch, you can expect some major updates in regards to what's next for PARK. But just so we don't leave you hanging here's a hint...diamonds.
